

# Create a COOL ZONE with **CO2 EFFECTS**

from SALVIN DESIGN

## Amusement Parks Water Parks Night Clubs Indoors or Outdoors

The High Output Co2 J et  
When placed over a crowd or on stage the CO2 Jet is a cryogenic effect system capable of making plumes of Cryo fog up to 20 feet long. Imagine taking that hot, sweaty crowd down to forty degrees in six seconds and up and extra notch in excitement. Your patrons will go wild in this icy cold blast. The CO2 Jet incorporates a proprietary Cryo valve, the effect is very reliable and repeatable. Stainless steel and brass construction yield a very rugged and reliable device. The CO2 jet can be used with high pressure liquid siphon CO2 tanks or a refrigerated liquid LP dewar tank. All this adds to its versatility.

**CO2 J ET RGB** gives you two effects in one small package! It uses 24, 1watt (8**R8G8B**) high power LED as light source. The **RGB** section is primarily composed of red, green, blue power leds which can emit 16,770,000 colors. All this light output (24w), coupled to a High Output CO2 Jet make for an amazing effect. The unique design and small size make it easy to hide on stage or hang from a truss using the supplied hanging bracket. Control for the LED's is by DMX or built in programs. At home on the stage or hanging from a truss. The **CO2 J ET RGB** comes with a hanging bracket that makes it easy to install, for truss hanging or placing on stage. It's widely used for Stage, Night Club, Amusement Parks, Water Parks. **CO2 J et RGB** adds a new dimension to the world of Cryogenic effects.

## MEGATRON 2.8
